Profile

Flutter Developer with hands-on experience in designing and building cross-platform mobile applications using Flutter and Dart. Proficient in creating responsive UI/UX, managing state efficiently, and integrating RESTful APIs. Skilled at delivering fast, scalable, and maintainable mobile apps for both Android and iOS platforms.

Education

Bachelor's degree in computers and information, specializing in Computer Science, Faculty of computer and information at Minia University 2021 – 2025

Professional Experience

Flutter Developer & Technical Head – GDG Minia (Volunteer Team) March 2023 – 2025

- Led the technical team and oversaw all technical activities and committee responsibilities
- Volunteered as a Flutter mentor to help students understand and build Flutter applications from scratch
- Guided participants on Dart basics, UI/UX principles, and Flutter development workflows
- Conducted sessions on Firebase integration, REST APIs, and app deployment techniques

Skills

Frameworks/Libraries:

Flutter, Firebase, Hive, REST API

Tools/platform:

Git, GitHub, Android Studio, Visual Studio Code.

Architecture & State Management:

MVVM, Cubit, Provider.

Programming Languages

Dart, C++, Java, c#, HTML, CSS.

Soft skills:

Problem-solving, Communication, Teamwork, Leadership, Self-learning.

Projects

Bonify, (Graduation Project) [🔗](#)

A cross-platform mobile app built with Flutter for detecting bone fractures from X-ray images. Enables image upload, displays ML-based diagnostic results, and supports chat between patients and specialists via RESTful API integration.

Bookly [🔗](#)

A Flutter application designed to enhance the reading experience with a clean, user-friendly interface. Allows users to browse and read books across various categories. Built using the **MVVM architecture** for better code maintainability and scalability.

Talksy [↗](#)

A real-time messaging app built with Flutter, Dart, and Firebase to enable seamless and secure conversations. Features include Firebase Authentication, Cloud Firestore for efficient message handling, and unique message identification to ensure reliable communication.

My Notes [↗](#)

A user-friendly note-taking app built with Flutter and Dart, featuring offline access and organized local storage using Hive. Implements Cubit (Bloc) for efficient state management and a smooth, responsive user experience.
