PROFILE

Junior Full Stack Developer with hands-on experience in building web applications using ASP.NET Core, Web API, Angular, and SQL Server. Skilled in developing responsive user interfaces, designing RESTful APIs, and integrating frontend and backend systems with practical experience in real-world projects, clean architecture principles, authentication systems, and database management. Passionate about continuous learning, problem-solving, and building scalable applications.

INTERNSHIP & EXPERIENCE

Full Stack .NET Developer Intern Information Technology Institute (ITI) 01/2026 – 06/2026

- Developed web applications using ASP.NET Core and SQL Server.
- Built RESTful Web APIs and implemented JWT authentication.
- Followed Agile methodologies and clean coding standards.
- Collaborated in an Agile team environment, participating in code reviews and utilizing Git for version control.

EDUCATION

Bachelor's degree in computers and information (Computer Science) 10/2021 – 06/2025

Faculty of computers and information at Minia University.

SKILLS

Backend Development

ASP.NET Core | MVC | Web API | RESTful APIs | Entity Framework Core | LINQ | C#

Frontend Development

HTML5 | CSS3 | JavaScript | TypeScript | Bootstrap | Angular | Razor Pages

Database

SQL Server | Database Design | EF Core Migrations

Architecture & Concepts

OOP | SOLID Principles | Layered Architecture | DTOs | Dependency Injection

Tools & Technologies

Git & GitHub | Postman | Swagger | Visual Studio

PROJECTS

LegalBridge | .NET 9 MAUI Blazor · EF Core · SQL Server

Developed a full-scale legal platform using Clean Architecture with Repository and Unit of Work patterns for high maintainability.

Streamlined legal workflows by building modules for case lifecycle tracking, judicial scheduling, and witness management.

Built a robust financial engine for fee tracking and balance management, featuring PDF reporting.

SmartTrip — Trip Cost Analyzer | ASP.NET Core MVC · C# · EF Core · SQL Server

Developed an ASP.NET Core backend for trip planning, integrating OpenRouteService and WeatherAPI for real-time routing and geocoding. Engineered a dynamic cost engine using EF Core, factoring in fuel efficiency, traffic, and weather conditions. Secured the application with ASP.NET Identity, implementing role-based access and email confirmation.

Lafyuu _ E-Commerce Platform

Built Lafyuu, a fully responsive e-commerce platform with Vanilla JavaScript, HTML5, CSS3, and Bootstrap 5, featuring a product catalog, shopping cart, wishlist, and order tracking for customers. Implemented an admin dashboard with product, order, and user management alongside role-based access control and secure session handling.
